**CRAVEN HALL TO TAKE HISTORY INTO THE FUTURE WITH THE  
#LVNGOLDSTANDARD FLAGSHIP**

**06/09/2020: [Warminster, PA]** — Historic Craven Hall has teamed up with Low Voltage Nation to bring the past into the future. A mainstay in the region, Craven Hall is fondly remembered by many as the backdrop for field trips, tea time, and the preservation and promotion of Warminster History, including famed John Fitch, inventor of the original steamboat engine! This weekend, it will once again make history as the flagship for Low Voltage Nation's cutting edge "Gold Standard" networking system.

Recently, the Craven Hall Historical Society added a 30-person Conference Room that is available to both historical societies and local businesses alike. The comfortable and meticulously detailed conference room was lacking Wi-Fi and internet access- a \$30,000 luxury the Historical Society could not afford throughout its campus.

Libertas Consulting, a member of both Low Voltage Nation and the Greater BucksMont Chamber of Commerce, organized a wildly successful donation drive that drew the attention of business owners from all over the country! Vertical Cable, located in Florida, donated \$10,000 in non-electrical infrastructure (conduits, wiring, mounting hardware, etc). Businesses in Tennessee, Colorado and New Jersey have also joined the effort! To date, more than \$27,500 has poured in to support the modernization. Donations include networking equipment like switches, a state-of-the-art router/firewall, conduits, wireless access points, wiring, and cash donations to offset the cost of Internet Service.

Thanks to the generosity of the Low Voltage Nation community, Craven Hall will unveil its technological face-lift to the public at 9AM on Saturday, June 13<sup>th</sup>! All are welcome and encouraged to join us for this historic leap from steamboat to Wi-Fi. Craven Hall Director, Eric Fleisher, will be on hand to discuss the future of exhibits. Ray Cline from Libertas Consulting will be present to showcase the cutting edge technology of Low Voltage Nation's Gold Standard system. Finally, Marco Chaffiotte, a Director for Low Voltage Nation, can answer questions about LVN's nationwide efforts to create opportunity for others interested in low voltage/technology careers.

Refreshments will be served.

**About Craven Hall**

Craven Hall is a Historical Society in Warminster that is dedicated to preserving Warminster History located on Norristown & Street Road. They also maintain a Steamboat Museum that has interactive exhibits displaying the work of John Fitch, the original creator of the Steamboat Engine.

**About Low Voltage Nation**

Low Voltage Nation was created to help others carve out a fulfilling career path in low voltage and technology. Based out of Nashville, TN, Low Voltage Nation boasts members from all over the country, as well as a healthy international base as well. Their mission is to connect low voltage and technology professionals to best practices in the field.

**About Greater BucksMont Chamber of Commerce**

Established in 1963 by a committed group of business professionals in response to the growing needs of the business community, the Chamber has become a vehicle to voice concerns before government entities, provide advocacy for services, and develops policy that seeks to stimulate economic growth. Their mission is to develop, encourage, promote and protect the commercial environment in which members conduct their various enterprises.

**About Libertas Consulting, LLC**

Founded on the principle that every dollar is important for small to mid-sized businesses, Libertas Consulting LLC streamlines tech processes and increases business efficiency through a dynamic range of client services including- but not limited to- help desk support, infrastructure support and upgrades, vendor management, low voltage wiring, secured wireless infrastructure, VoIP/PBX phone support and installations, security camera installation and hosted cloud solutions.
