**Ben Wilson Senior Activity Center Wins a \$50,000 Tech Upgrade**

**(WARMINSTER Pa.)** – The Ben Wilson Senior Activity Center, located in Warminster, Pa., is the winner of a technology upgrade valued at \$50,000, which was offered by Libertas Consulting, LLC, Low Voltage Nation (LVN) and The Greater BucksMont Chamber of Commerce (GBMCC). The installation is expected to commence in the next few months.

While many businesses and organizations were able to pivot during the pandemic and offer their products or services either via the Internet or by way of a hybrid online order/pick up in person model, there were those that were limited in their ability to pivot due to issues with their technology. It is that kind of organization that Libertas, Low Voltage Nation and The Greater BucksMont Chamber of Commerce were looking to help.

In April the group announced that they would be accepting entries from business and organizations throughout Bucks and Montgomery counties. Close to 30 entries were received and a committee of business people from across the country went through each entry and ultimately chose the Ben Wilson Senior Activity Center (<https://bwsac.org>), a non-profit organization whose mission is to promote the social welfare of persons aged 55 and older by encouraging good fellowship and companionship among members. The center offers social activity, community improvement projects, and other programs conducive to the physical, mental, and social well-being of its members.

“Bringing people together and using our expertise for service work is at the core of our mission,” remarked Blake Urmos, LVN founder. “Personally, it is a very big deal to be part of the Ben Wilson Senior Activity Center project. On behalf of Low Voltage Nation, we thank everyone for the opportunity.”

This is the second time that Libertas Consulting, LLC, Low Voltage Nation and The Greater BucksMont Chamber of Commerce have donated a tech upgrade. Last year, they delivered over \$50,000 worth of Internet and technology upgrades to historic Craven Hall, the former home of John Fitch, inventor of the steamboat. All equipment, services, installation, hardware and implementation were generously donated so that Craven Hall could continue to preserve the history of Bucks County.

Amanda Gershanick, Nutrition & Community Service Coordinator, Ben Wilson Senior Activity Center remarked, “We are truly honored and beyond delighted to have been granted this wonderful opportunity especially during these challenging times. This opportunity to improve our IT technology, security and much more gives us the opportunity to serve the local community especially the senior community more efficiently and effectively.

“Working with GBMCC and LVN for the second year in a row and bringing together businesses and individuals locally and across the country in support of a local business, really shows the true dedication to the mission of our organizations, which is in the spirit of helping one another,” said Ray Cline, owner, Libertas Consulting. “I couldn’t be happier to be a part of this amazing community project!”

### **About Libertas Consulting, LLC**

Founded on the principle that every dollar is important for small to mid-size businesses, Libertas Consulting, LLC streamlines tech processes and increases business efficiency through a dynamic range of client services including, but not limited to, help desk support, infrastructure support and upgrades, vendor management, low voltage wiring, secured wireless infrastructure, VoIP/PBX phone support and installations, security camera installations, and hosted cloud solutions.
